

Candidate Consider

Software Engineer

PROFESSIONAL SUMMARY

Software engineer with three years of web-service experience and recent hands-on Python delivery in internal automation projects.

EXPERIENCE

Software Engineer - Meridian Commerce - 2024 to Present

- Maintained Node.js REST APIs and integrated payment and inventory services.
- Created Python scripts that reduced manual reconciliation time by 12 hours per month.
- Used Docker for local development and continuous integration builds.
- Participated in production incident reviews with the service owner.

Junior Software Engineer - Cedar Works - 2023 to 2024

- Implemented TypeScript endpoints and MongoDB data access for internal tools.
- Added unit tests and API documentation for two customer-facing features.

SKILLS

TypeScript, Node.js, Python, REST APIs, MongoDB, Docker, GitHub Actions

SELECTED PROJECT

Built a small FastAPI service for an internal hackathon and deployed it to a test environment; production ownership and relational database experience are not stated.
